

Job Title: National Park Service Structural Fire Protection Internship

Position Information

No of Openings: 7

Work Schedule: 40 hrs per week for 10 weeks

Hours per Week: 40

Wage/Salary: \$170 per week plus travel allowance and housing

Start Date: May 2017

End Date: July 2017

Job Description: Interns will help parks establish structural fire protection codes and standards and gain practical experience, while supporting park efforts to establish and maintain an effective structural fire prevention program, thereby reducing the risks of death, injury, and lost buildings from structural fires.

The intern may be involved in one or more of the following projects, depending on the needs of a particular park:

- Helping to develop a fire inspection program by identifying target hazard buildings.
- Developing evacuation plans.
- Working with park facilities management to develop an Inspection, Testing, and Maintenance (ITM) plan for fire protection systems.
- Conducting training classes on portable fire extinguishers.
- Establishing a hydrant inspection and flow test program.
- Establishing a hot work permit program.
- Reviewing plans for construction and providing feedback to the supervisor and Regional Structural Fire Manager.

Qualifications: Knowledge, skills, or experience with:

- Fire inspection and code enforcement
- Plan review
- Detection, reduction, or elimination of potential fire hazards
- Fire protection engineering
- Developing, implementing, or providing training in fire protection and prevention

Or:

Student has successfully completed 2 years above high school with related course work in fire protection engineering or other related fire administration fields of study.
